HERE TO HELP

Aalto SciComp / RSE

High performance compute cluster and go-to resource for demanding scientific computing, data science, software dev, and data storage. Local personal support and training.

HPC computing resources

- Computation: 13500 CPUs in 300 nodes.
- More than 480 GPUs available
- Up to 128 CPUs/node and up to 2000GB memory/node.
- Storage: 2PB high-performance Lustre filesystem.

Software on triton

Pre-installed ready to use software (pytorch, tensorflow, R, Matlab etc). Sign on with Aalto account.

Software development support

- Consulting and support for use and deployment of LLMs, and creating your AI apps.
- Support with software development, deployment, maintenance, optimization and web development
- Daily help sessions

Training

Courses for scientific programming, HPC usage
